

PIA Vietnam 2009 attracts leading instrumentation and laboratory supply companies to enhance Vietnam's industrial and R&D developments

After an 18 month interval the second PIA Vietnam show returns to Ho Chi Minh City from 16-18 September this year. PIA Vietnam comprises three distinct elements – Process Vietnam 2009: The 2nd International Plant & Process Engineering Exhibition; Instrument Vietnam 2009: The 2nd International Instrumentation, Measurement & Testing Exhibition, and Analysis & Lab Vietnam 2009: The 2nd International Analysis & Laboratory Technology Exhibition to provide a trade show for enterprises that are seeking to expand and upgrade business practices with quality-proven applications and solutions.

Taking place in the newly-opened Saigon Exhibition and Convention Centre in District 7 of Ho Chi Minh City, the show projects a strong international image with group pavilions from Korea, Singapore and the United Kingdom.

Targeted to attract more than 100 exhibiting companies and 5000 professional visitors the show is ideally timed while Vietnamese companies seek to upgrade the quality of their manufacturing processes and technical know-how.

Featured amongst the noteworthy list of exhibitors is Saigon ISC, a leading supplier of equipment and instruments for research laboratories, quality control in environmental analysis, pharmaceutical, cosmetic, food & beverage, fishery, agriculture & forestry, material testing, petrochemistry and life sciences in Vietnam.

Saigon ISC represents and will showcase products from leading technology players such as Perkin Elmer (US), Nikon (Japan), Labconco (US), Binder (Germany) and Anton Parr (Austria).

Recent projects undertaken by Saigon ISC include :

- Laboratory systems in Environmental Monitoring for Institute of Environmental Technology - University of Technology.
- IVF laboratory systems for TuDu Hospital, National hospital of Obstetrics and Gynaecology, Hung Vuong Hospital, Haiphong Obstetrics and Gynaecology Hospital etc.,

- Turn-key laboratory systems for complex of Petrochemistry Industry, Power, Fertilizer, Energy for Dung Quat Refinery Factory, PhuMy Power Station, CaMau Power Station etc.,
- Food quality controls centers of Directorate for Standards, Metrology and Quality – Ministry of Health, Institute of Hygiene and Public Health, Institute of Military Epidemic Prevention, Pasteur Institute in Hochiminh City and many more.

It is increasingly recognised that advanced developments in the food and pharmaceutical industries require special chromatography systems such as the UV/VIS HPLC System with its productivity and resolutions that can solve problems in high pressurised work environments and improve efficiency by consuming less, reducing waste for a greener & cleaner earth, with environmentally-friendly products.

Amongst products on show will be the new UHPLC system, the Flexar model from Perkin Elmer, developed to meet the demanding requirements of laboratories for the best result in research & quality controls in the environmental, food and pharmaceutical industries.

Ultra high performance means the highest resolution, highest sensitivity and fastest analysis -in other words, a superlative LC system. Flexar FX-15 is the ultimate in UHPLC with maximum throughput and minimum stress.

- The dual-reciprocating piston 18,000 psi pump provides as much as 10x or more improvement in productivity.

- The integrated piston wash function keeps pump pistons clean, even with buffers.

- Synchronized Injection for ultimate precision.

High-speed FX UV/Vis (100 pt/sec) with high-efficiency 2.4 µL flow cell

Also on display will be solutions from Anton Paar on concentration, density and sound velocity measurement in Industry processes.

Anton Paar's online instrumentation ensures the continuous control of product quality and

product specifications within tight tolerance limits. A variety of wetted parts, materials and process connections are available to suit each application.

Sulfuric Acid Monitor, Cobrix3 Beverage Analyzer, Oleum Monitor, Brix Monitor, API Petroleum Monitor, Beer Monitor, Rolling Oil Monitor, Alcohol Monitor, Phase Change Monitor, Density Monitor, Formaldehyde Monitor

Density measurement with DPRn 417/DPRn 427/422/407/4122

Density Transducer

Sound velocity measurement with SPRn 4115/SPRn 4215/SPRn 4214

Sound Velocity Transducer

Combined density and sound velocity measurement with DSRn 427 Density/ Sound

Velocity Transducer and DTR 427/DTR 407/4122/4115/4215

Density Transmitter

Commenting on Saigon ISC's participation at PIA Vietnam2009, Mr. Hoang Anh

Tuan, Saigon ISC President and CEO, reaffirms the value of such an event, "As a leading market player, it is important that Saigon ISC consistently engages with the market. With PIA Vietnam's track record in attracting 115 exhibiting companies and 5640 professional visitors the show provides an excellent platform for us to present the latest range of innovative technologies".

PIA Vietnam2009 is Vietnam's leading event in process engineering, instrumentation, laboratory & scientific equipment. It attracts a wide spectrum of target buyers from industries as diversified as foods, cosmetics & healthcare, retail packaging, frozen food, beverage, oil & gas, pharmaceutical, laboratory, brewing, seafood industry and general manufacturing and processing industries, government ministries & agencies, R&D specialists, scientists, distributors & importers. The event is organised by Hong Kong Exhibition Services Ltd and VCCI Exhibition Service Co Ltd.

For more details, please visit the show website www.pia vietnam.org or contact the organiser.
